ABSTARCT: We all know that now a day crime rates is frequently increasing day by day in our society from this we get an idea to developed the system. Problem was that people got tried by going here and getting justice so our application is capable for registrating FIR online, shows investigation update, delivering news about crime, etc. So it is an application which provides solutions to the problems faced during the taking the action against the crime

I. INTRODUCTION

The crime record management system project is a web-based application that provides facility for reporting online crimes. The proposed system specifically looks into the subject of Crime Records Management. User can register their complaints online. The system at any point of time can provide the details of existing charge sheets and their statuses. People can check missing persons details online using this system. The system at any point of time can provide the details of the police station and the employees. This system is also show most wanted person details online on the police website. The system at any point of time can provide the details of victims and the registered FIR's. Using this system any Number of clients can connect to the server. The system at any point of time can provide the details of evidence and their sequence. This system also allow user to view all most wanted persons which can be given by the administrator.

II. EXISTING CRIME RECORD MANAGEMENT SYSTEM

In the existing crime management system, most of the operations are done manually like send complaints, taking actions against crimes, view status etc. This system needs more man power to track the records of crimes. The existing system doesn't have system security. The existing system is time consuming and not very user friendly. So, with the existing system if anybody wants to complaint against crimes he must do it through the police. Retrieving old crime records is very time consuming. In the current system all work is done on papers so it is very difficult to secure crime reports data. Error detection in the previous entries made and data cross verification is another important function. These are done manually, and it would take time. the existing system has more workload for the authorized person, but in the case proposed System, the user can register in our site and send the crime report and complaint about a particular city or person.

III. PURPOSE OF SYSTEM

The proposed crime records management system can overcome all the limitations of the existing system. The system provides proper security and reduces the manual work. The efficiency of the police function and the effectiveness with which it tackles crime depend on what quality of information it can derive from its existing records and how fast it can

have access to it. The existing system has several disadvantages and many more difficulties to work well. The proposed system tries to eliminate or reduce these difficulties up to some extent. It is proposed to centralize Information Management in Crime for the purposes of fast and efficient sharing of critical information across all Police Stations across the territory. The proposed system helps the user to work user friendly and he can easily do his jobs without time lagging.

Modules of the crime record management system Project

Police stations registration module:

This module maintains the information about all the police stations that are registered as per the jurisdiction of the system. For the registration part each station enter their details like station name, address, phone no, station in charge etc. and get a User Id from the Software. It also gets integrated with the employees who are working in these stations along with their designation. Once the prospective station registers with the software they can avail the existing records.

Victims FIR registration module:

This module helps the user to report online complaints. This module maintains the information related to the first investigation report of the crime sequences that have taken place. For the registration part each person enters their details like name, address, phone no., E-Mail ID etc. and get a User Id & password from the Software. This module helps the user to report online crimes. Once the registration is complete, the citizen can sign-in to the website & register their complaint. The Fir registers all that a

data that is necessary for the investigation to take place in proper length. This module allows us to view the status of all complaint that you have posted earlier. This module helps the user to report online missing persons details. User can also upload missing person photo. User can also check the missing person details online. It identifies the crime category and the crime nature. This module is used for entering all details about the crime. It contains the date and time, police station where it is recorded, place, Nature of Crime, Location of the Crime etc.

Download Crime Information Management System Report with source code this project report contains data flow diagram and entity relationship diagram and feasibility report. Criminal Record Management System in asp.net Engineering CSE and IT Final Year Students who are interested in developing security related online website then Crime Records Management System using ASP.Net

This project will also be able to provide reports of various cases, FIR report, charge sheet report, Most Wanted Criminals record, payroll, attendance reports and also Crime File Management System in java is a software application developed using VB.NET and SQL Server. The user can file a complaint, add a criminal report, upload the Crime File management Project in asp.net with project documentation - Free download as Word Doc (.doc / .docx), PDF File (.pdf), Text file (.txt) or read online for free. A Project report for Crime File management in java jsp with source code.

Search module

In this module, we can search the crime in station wise, nature of crime.

Administrators Module

The administrator module includes,

The module will be protected by user ID and password. Using this module user can view and reply user's complaint details.

Ordinary users of the software will not be permitted to enter into this area of the software. Using this module admin can check and reply user's crimes details.

Using this module admin can add, delete and view most wanted person details.

Admin can also add, delete and view missing person details in this module.

Using this module admin can add and view criminal registrations.

Using this module admin can add and view Fir reports.

Crime Information Management System. This is a Crime Information Management System software for police station. Here in this software all the information of the Director General's Message: Welcome to the website of National Crime Records Bureau. Located at New Delhi as the attached office of Ministry of Home Affairs. A criminal record or police record is a record of a person's criminal history, generally used by potential employers, lenders etc. to assess his or her trustworthiness. The National Crime Records Bureau, abbreviated to NCRB, is an Indian government agency responsible for collecting and analysing crime data as defined by the Indian Free Download Project Crime Reporting System Project in PHP with my sql with source code and project synopsis. Identity History Summary Checks Also known as: fbi background check, criminal records, criminal background check, background checks, criminal record.

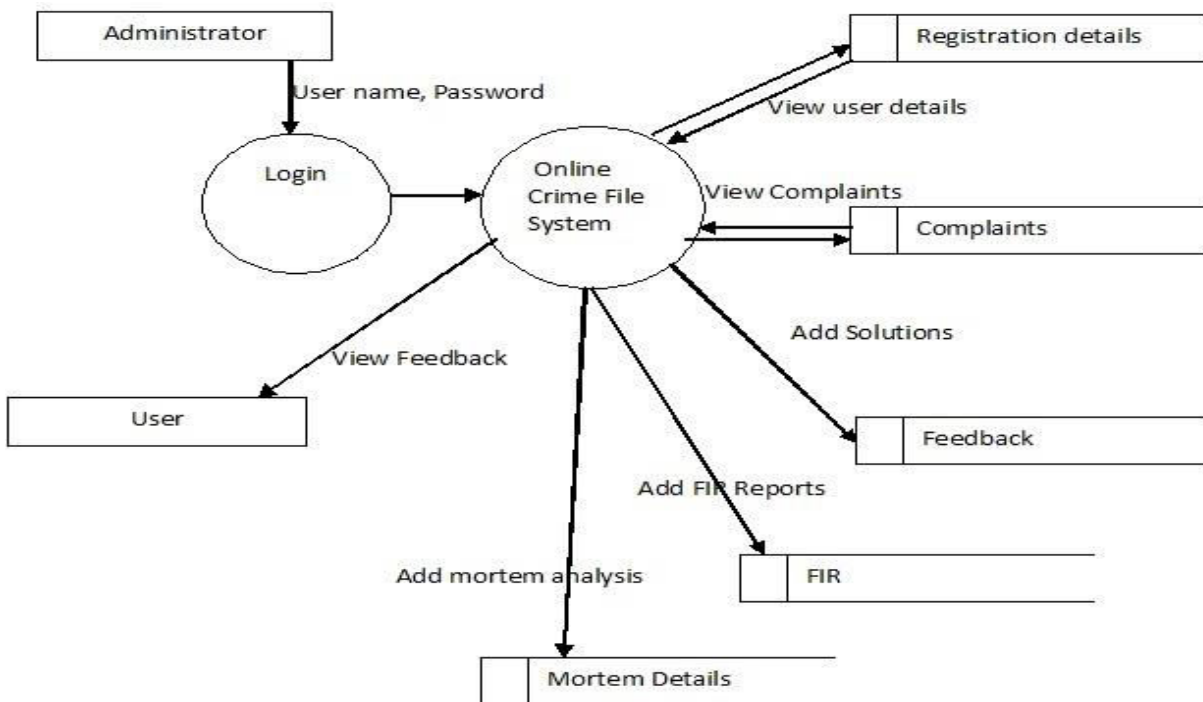

IV. DATA FLOW DIAGRAM OF CRIME RECORDS MANAGEMENT SYSTEM

Context flow diagram

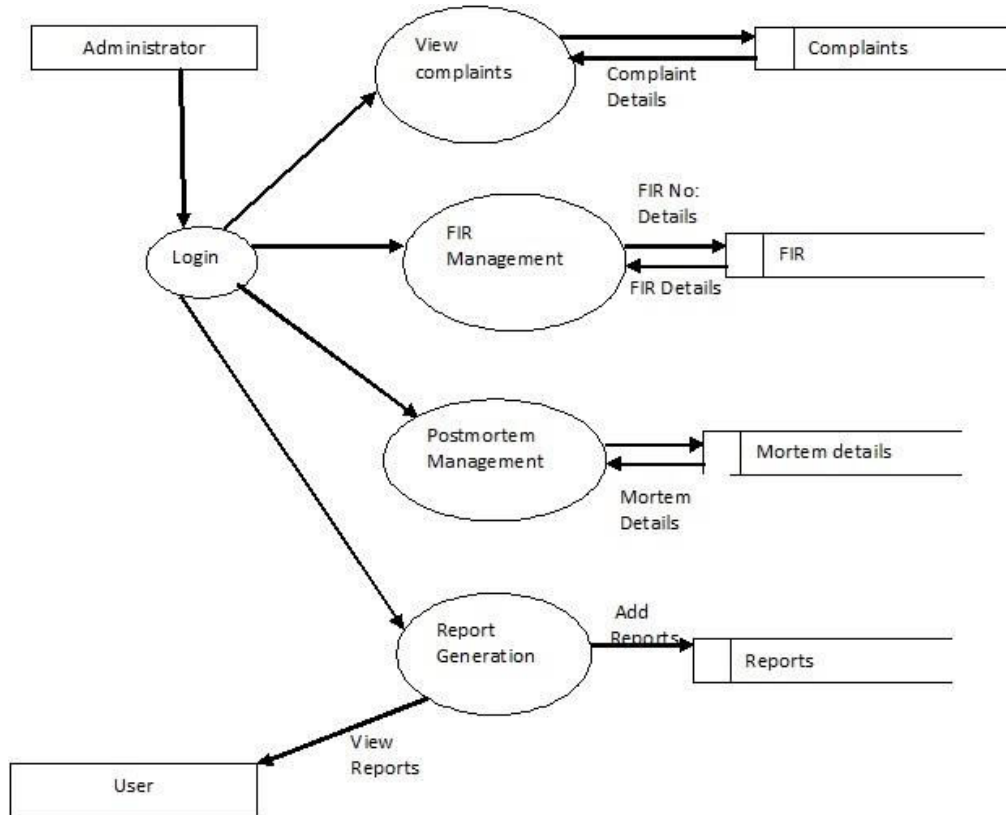

Level 1 DFD- Administrator :

Our data includes more than criminal records, such as civil filings and traffic and other minor offenses, so people listed may not be actual criminals. Also, not all criminal. Crime file system project report seminar/ pdf/ ppt download; The project is aimed to develop a crime file for maintain a computerized. The Supreme Judicial Court (SJC) recently revisited a nearly 20 year old opinion that imposed an onerous burden of proof on former defendants trying to seal their criminal records in the Commonwealth. Previously, . Free Download Crime Information Management System Report. This is the oldest and the most prestigious publication brought out by NCRB. The data for the report is collected by State Crime Records Bureau (SCRBx) from the District Crime Records, Links to search Criminal History records, Criminal History questions and answers, background check reports, Fingerprint Requirements, Juvenile.

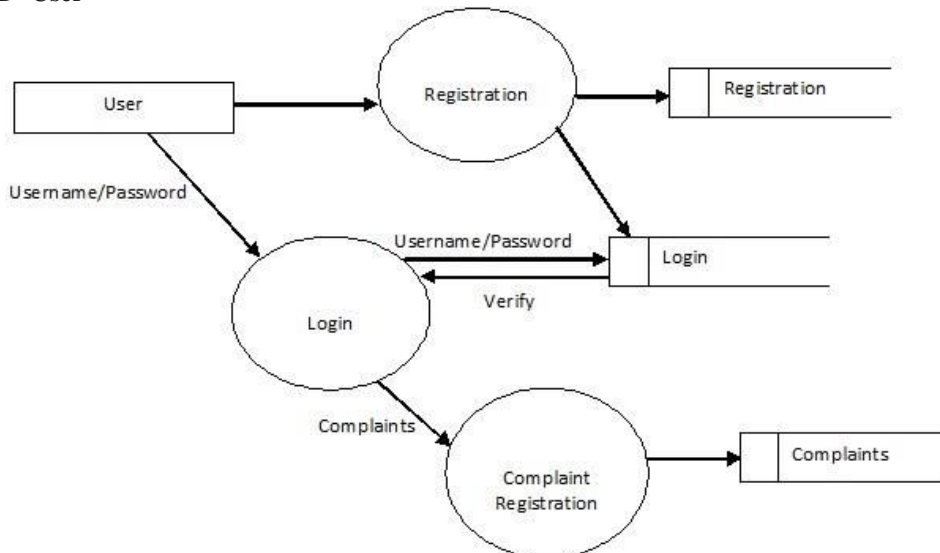

Level 2 DFD- Administrator

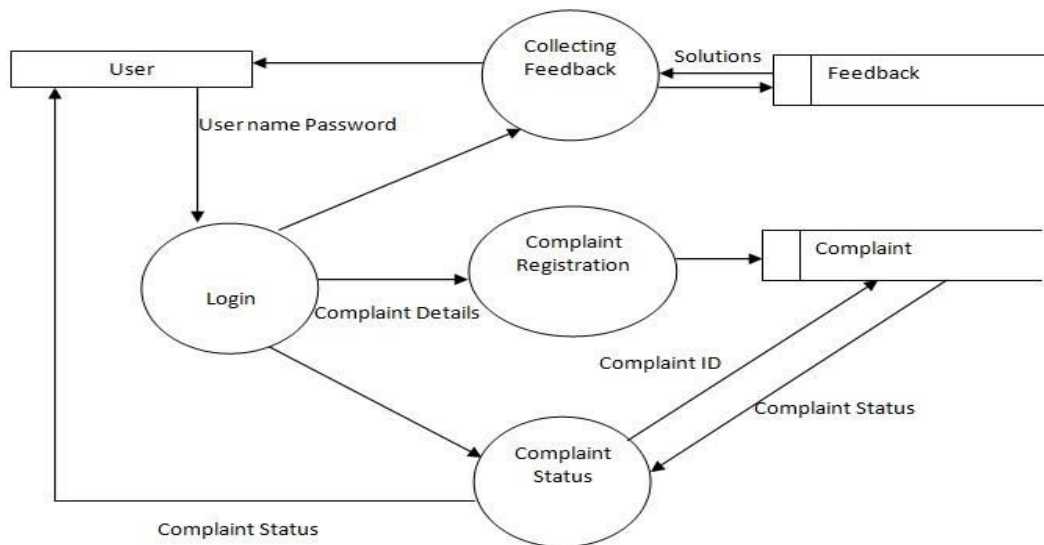

Sometimes criminal records can hint at a person’s character and the expectations one would have of them, and sometimes they only indicate the youthful behaviour of a download crime record management system source code and project report with ppt. useful for police departments form managing criminal records pending cases, Crime Reporting System Project In java with source code and project report titled as Crime File Welcome to the Official Website of the State Crime Records Bureau (SCRB), West Bengal The SCRB West Bengal has established itself as Crime-Criminal Record STATE CRIME RECORD BUREAU, MADHUBAN. Road Users to obtain round-the-clock Services, Dial Toll Free Traffic Help line: 1073 (for BSNL), 1033 (other cell company), database for criminal record management system - Free download as Word Doc (.doc / .docx), PDF File (.pdf), Text file (.txt) or read online for free.

Level 1 DFD- User

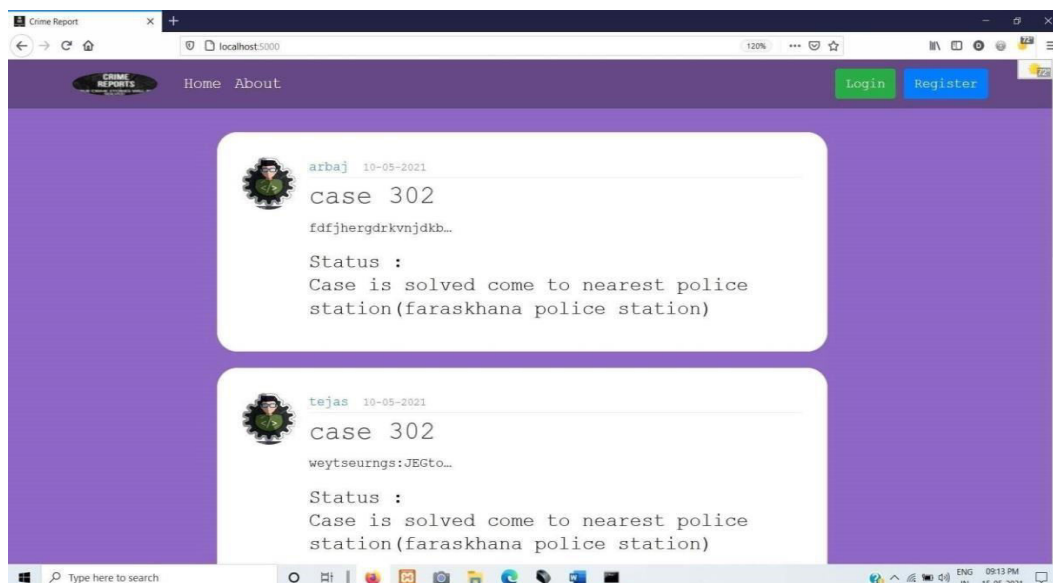

Complete design Crime Records Management System using ASP.Net can be helpful. The main idea for developing this project is to develop a online application for improving complaint system. police software - crimestar is a powerfull records and investigation system designed to meet the needs of police, sheriffs and private security agencies at an affordable price. Crime record management system project Description: Crime record management system project is useful for police departments form managing criminal records, Crime Records Management System a ASP.net Project - Download as Word Doc (.doc), PDF File (.pdf), Text file (.txt) or read online.

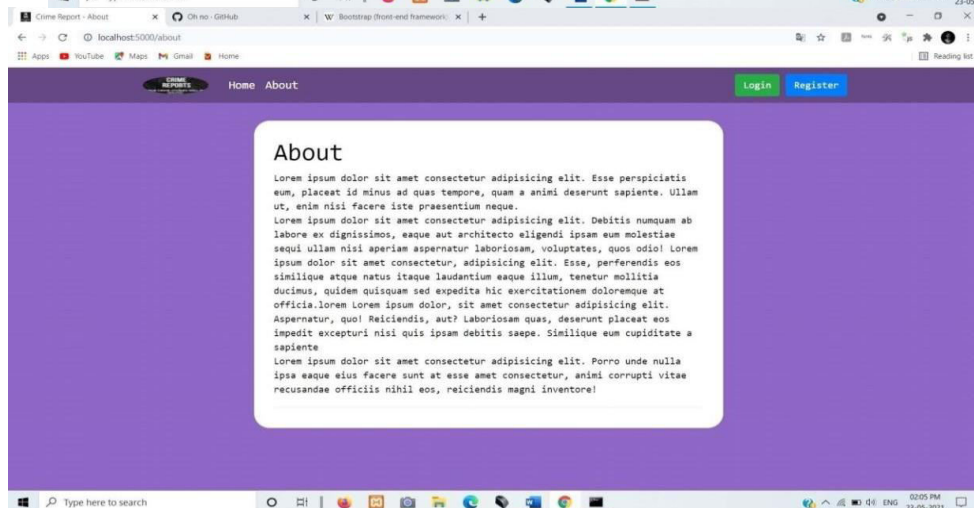

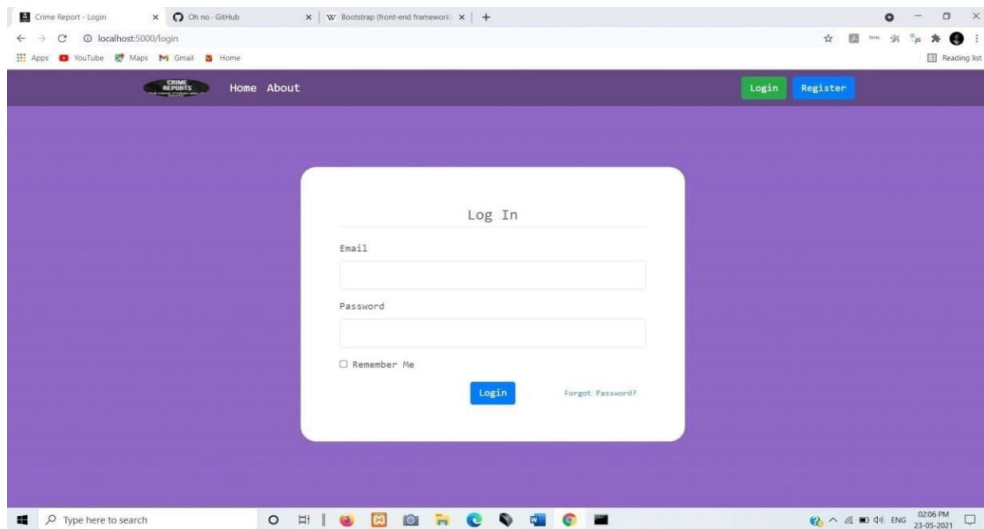

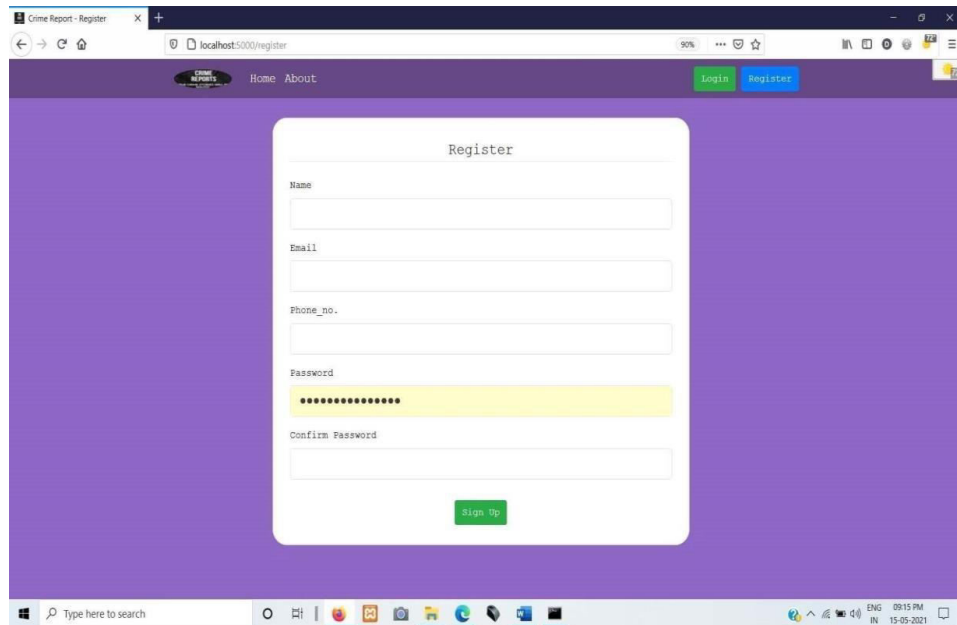

Level 2 DFD- User :U.S. Department of Justice Federal Bureau of Investigation Criminal Justice Information Services Division LAW ENFORCEMENT RECORDS MANAGEMENT SYSTEMS. Crime Information Management System (CIMS) allows user to store police department’s case details, Complaint Details, FIR Details, etc

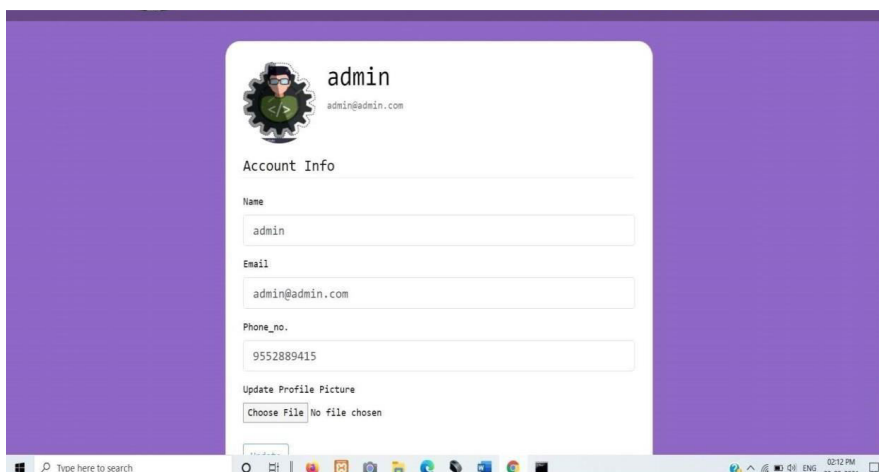

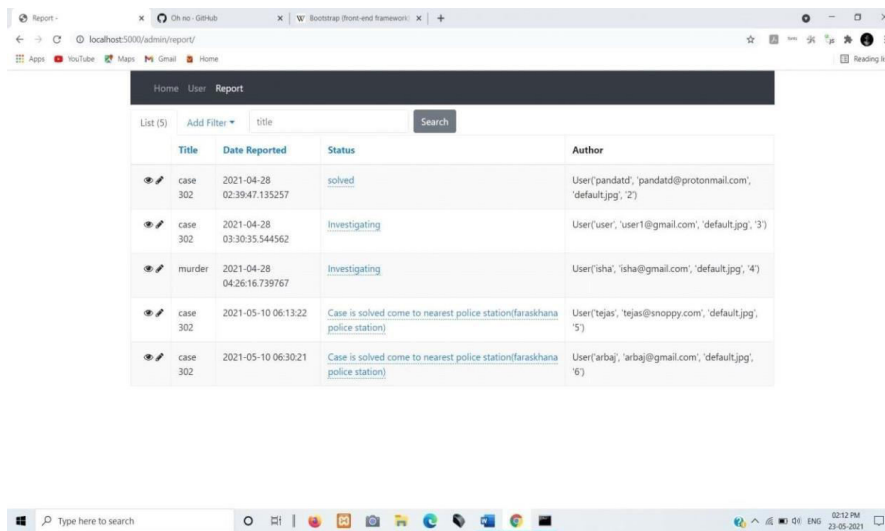

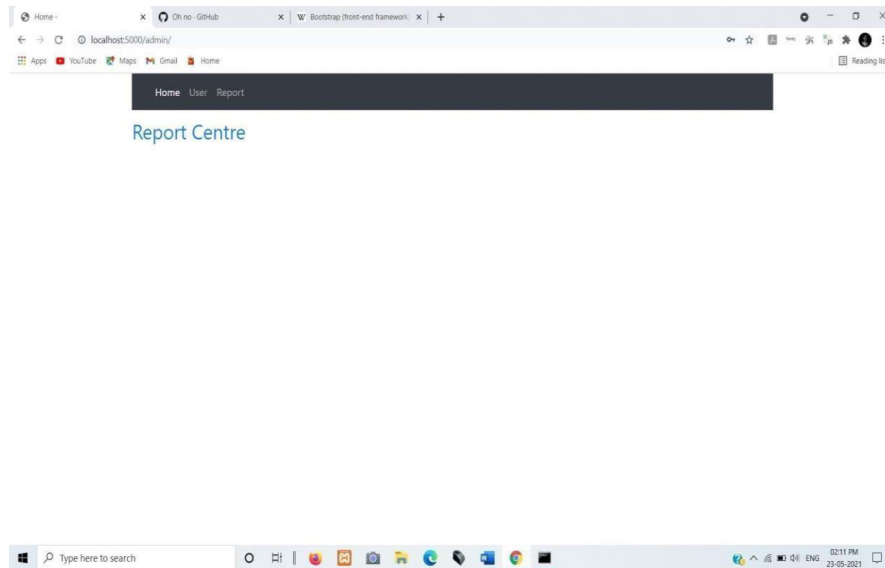

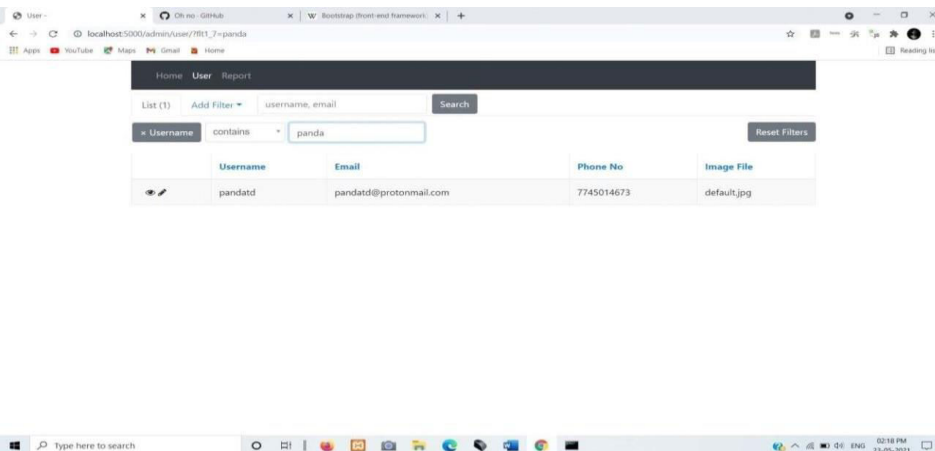

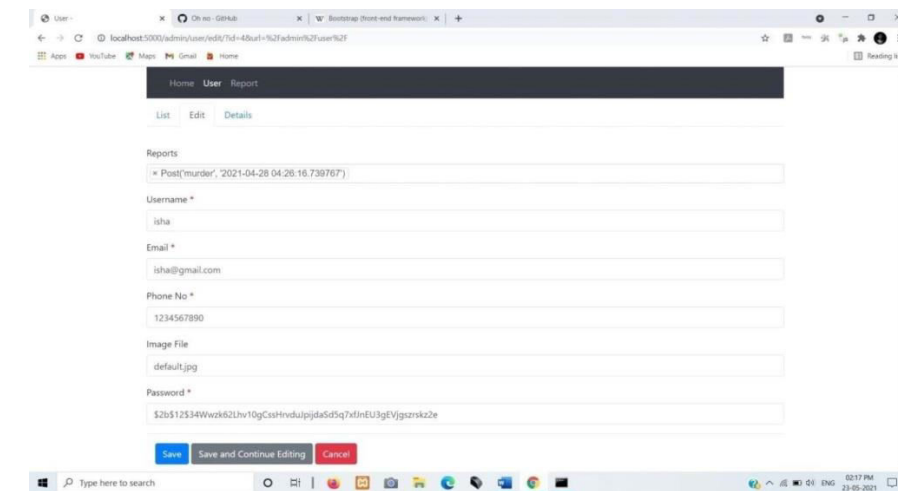

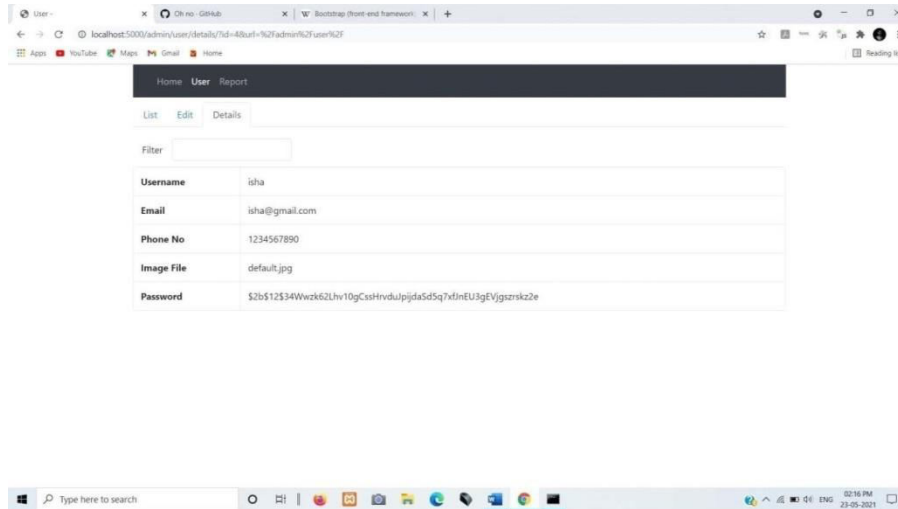

A criminal record or police record is a record of a person's criminal history, generally used by potential employers, lenders etc. to assess his or her trustworthiness. This is a Crime Information Management System software for police station. Here in this software all the information of the police station will be stored here. RIMS Law Enforcement Records Management System is the most effective way to organize, track and access the vast amount of information that flows through.

V. SYSTEM RESULT

VI. CONCLUSION

The project titled as “Crime Reporting System” is a web based application. This software provides facility for reporting online crimes, complaints, missing persons, show criminal details. This software is developed with scalability in mind.

Additional modules can be easily added when necessary. The software is developed with modular approach. All modules in the system have been tested with valid data and invalid data and everything work successfully. Thus the system has fulfilled all the objectives identified and is able to replace the existing system.

The project has been completed successfully with the maximum satisfaction of the organization. The constraints are met and overcome successfully. The system is designed as like it was decided in the design phase. The project gives good idea on developing a full-fledged application satisfying the user requirements. The system is very flexible and versatile. This software has a user-friendly screen that enables the user to use without any inconvenience. Validation checks induced have greatly reduced errors. Provisions have been made to upgrade the software. The application has been tested with live data and has provided a successful result. Hence the software has prove to work efficiently.
