Technology, Shegaon, India.

**ABSTRACT**: In this current situation (technology dominated world), small-scale entrepreneurs suffer due to nonmobility as well as common people in tier 2 cities are unable to get most of the services at their doorstep. In the current scenario, we people are so into technology that we don't want to make too many efforts to get things done we always wanted an easy way to get things done in lesser time as well. Suppose any of your appliances breaks down, let's say your cooler breaks down in hot summer then it would be a very tedious task to go out in summer and find a repairing person to overcome such situation our application "On Click Services" will came into the picture. So this project is all about providing the household services at your doorstep by finding the nearest professionals at your fingertips. Similarly, the app would help small-scale entrepreneurs to grow faster and reach out to many customers in the city.

KEYWORDS: Household Services, Mobility

#### I. INTRODUCTION

In this fast-growing technology, we still have to take the appointment of person who solve the problems related to our daily life like plumbing related problem, mechanical problem, electrical problem, electronic problem, pest control etc. To take the appointment of service provider we have to call him or with the personal meeting we can meet him, and it is not sure that we get the appointment of the service provider at a time because there are many problems occur, like the service provider is busy at somewhere else or he is not present at his office when we go there or he wants heavy cost for fix the problem etc.We are not getting any service on time and also not proper changes of services. It is also not secure in terms of safety concern.

To overcome this type of problem we are going to make our website where the people get appropriate result. This website is very dynamic and very easy to understand. The interface of the website is very easy and anybody can easily work on it. This website can provide all the description and important information about the problem.

On Click Services website is the new trend in the market of on-Demand websiteWith proper market research, the inclusion of vital features, followed by appropriate marketing can make the app successful. The demand for On Click Services website will be on the rise as we imagine we all want an Irona in our lives. The age-old canters are not going to cause you any worries anymore. The trusted On Click Services website with professional and qualified personnel can repair and fix everything around your home in an efficient manner. Problems get accentuated with rapid urbanization, rising incomes, and an abundance of low-cost workers. People are constantly in a hurry and are willing to pay more to ensure a certain level of service. The only other option available when scouting for these handymen is to avail of the services of inept search directories and run the risk of being bombarded by incessant calls. Moreover, with smartphones being the preferred gateway to these services for most people and with monumental growth in its penetration across the country. As the existing application "Urban Clap" is only available in metro cities, this application extends its reach to all the cities across India. This website also aims to implement a contract-based model for flats around the city as an add-on service to their apartments at a reasonable amount.

# **II. LITERATURE SURVEY**

1. Urban Housekeeping Service: Urban Housekeeping Service is a project to automate the "Process of scouting and hiring professionals who provide housekeeping services" by developing a system that is efficient and user-friendly. The main idea of the project is to maintain and handle all domains involved, from cooking, cleaning to babysitting and many other domains. There is a need to automate this sector because till now it is managed manually. So, by making a proper system for this process, the overall process can be done efficiently and proper utilization of resources can be done. It will also aim at providing a clear picture of how the entire process is taking place stepwise so that the chances of frauds and errors can be minimized.

|| Volume 11, Issue 5, May 2023 ||

| DOI: 10.15680/IJIRCCE.2023.1105041 |

2. Housejoy: Housejoy is an online on-demand service provider that caters to all home needs including Construction, Maintenance and Supply Chain Management. The success of an organization depends upon the effective leadership and job satisfaction of employees. An efficient leader is the one that provides direction to the organization and let the followers achieve their goals. High employee satisfaction helps to retain the employees of an organization.

#### **III. PROPOSED SYSTEM**

This module is responsible for maintaining the personal information of a user by manual entry including basic details of service. There are various services which are frequent to customer, these details are very helpful for providers.

There can be several sources from which user related information can be obtained: the user himself. User can book service for provider and this request send to the provider The standard way to get specific data is by linking to the user provider module The website will have two modules namely user and provider.

Fig 3.1: Design architecture

# 4.2. Modules:

• User:

In this module the user has to first register on our website by using their name and some credentials that are required for registering. And in this module the user has to register only one time after that he/she can do sign in for using their account. After registering user have to create their profile. Also, after user sign in a dashboard of our website is shown were the numerous of services are listed out. The services are like electrician, plumber, mechanic, beautician, painter and many more. User can select any of the services that they want and booked a service for their date and time, after booking a request send to the provider for their response.

Fig 4.8: Service provider details

#### V. ADVANTAGES

- Trusted Professionals
- Ideal for last moment requirement
- All requirements are processed according to choices

#### **VI. CONCLUSION**

On Click Services are needed and demand for services is increasing as people are so busy with their work that no one has time to do things. And Professionals (i.e. service providers) also need the right platform to be able to measure their business to reach as many customers as possible. That would give them an opportunity to grow quickly. According to literature research and interviews, home-based services and delivery can be supported by many features of interest to the property owner, engineer/builder, occupier, sender/seller, service provider, employer, and municipality. through the services found in the books and discussions presents three interesting points of focus; saving on the cost of new service as well influence on building image
